Orienteering (Style obstacle)

Navigate the obstacle one handed forming equal circles around each compass point at walk

Objectives

Enter between from the south (between the red and white flags)

Circle around east on the right rein

Circle around north on the left rein

Circle around west on the left rein

Exit through the south flags

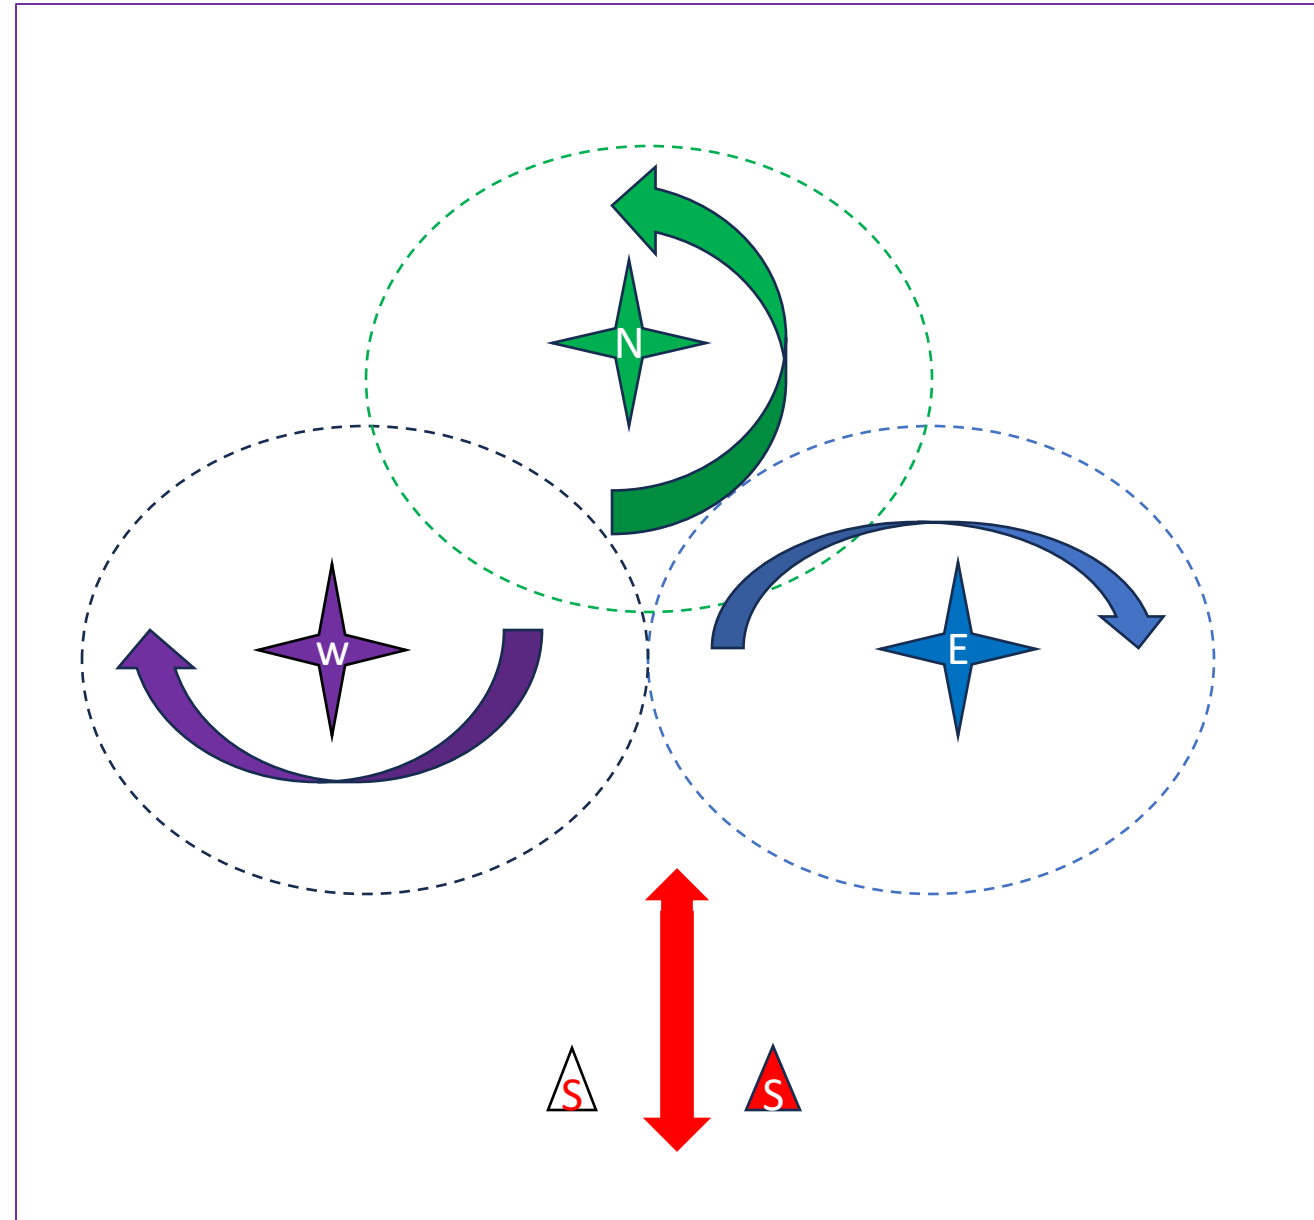

To show the appropriateness of the rider's aids and obedience of the horse. The obstacle is complete once the horse tail is clear of the south exit flags.

Effectiveness faults

- Running out or circling before entering the obstacle
- Refusal including stepping back
- Touching a post
- Change of gait including break in forward motion
- Putting both hands on the reins or swapping hands = 0
- Orienteering the circles in the incorrect order = 0

Style evaluation

- Regular forward motion
- Good rider position
- Horse and rider maintain balance at all time
- Well shaped circles
- Discreet rider aids

The Pear Drop (gait obstacle)

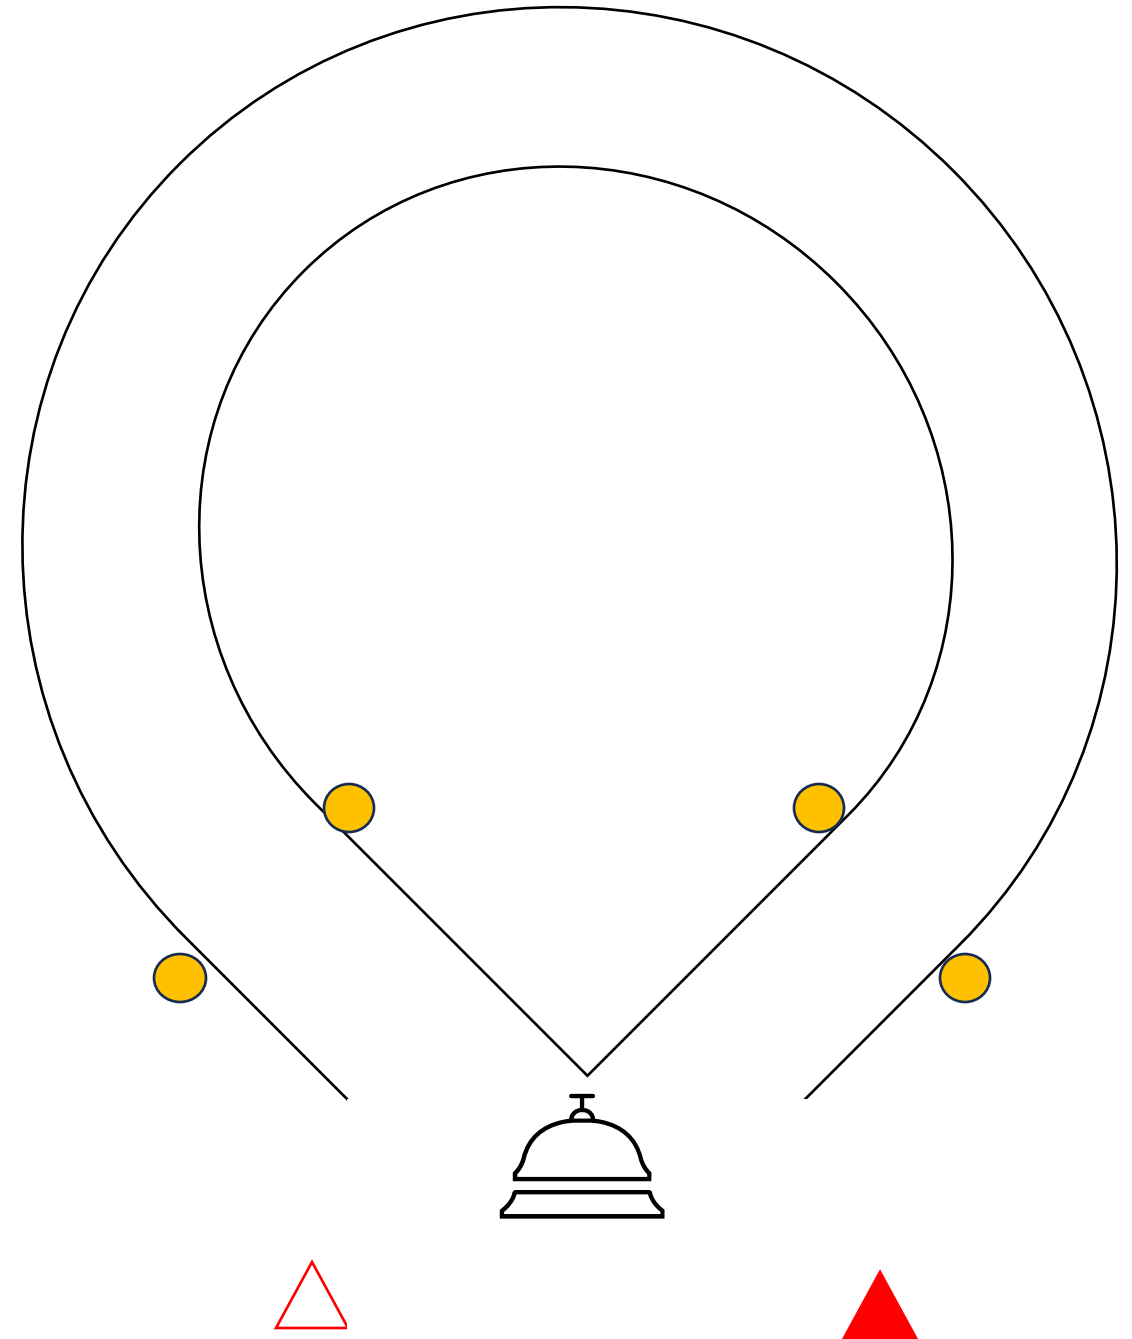

Objectives

- To show the appropriateness of the rider's aids and obedience of the horse
- The horse must be stationary for the rider to ring the bell to start and finish
- Pick up your chosen gait between the markers.
- Ride and maintain chosen pace around the marked corridor
- Pace must be maintained until rear legs are clear of the finish markers
- The obstacle can be ridden in either direction
- Novice & Newcomers – 2 handed
- All other classes – 1 handed

Effectiveness faults

- Change of gait/break in forward motion
- Running out or circling before the obstacle
- Refusal including stepping back
- Not ringing the bell to start/finish = 0
- Riding out of the marked corridor = 0
